I am

a bodybuilder,who is in need of an assistance to choose to my best food for my health based on nutrition.

I'm trying to

use the recent technologies to check the nutrition of fruits to choose my consumption based on it.

But

I am unaware of the existing technology that can help me to guess the nutrition of various fruits.

Because

I don't want to make any wrong decision about nutrition.

Which makes me feel

bad because I'm not able to choose the right food for the maintenance of my health
